EDITORIAL

It is with immense pleasure and a deep sense of accomplishment that I present the second edition of the Ambrose Alli University Journal of Medical Research (AAU-JMR). The journal remains dedicated to promoting scholarly excellence by publishing high-quality research contributions across diverse fields of medical and biomedical sciences. In addition to innovative and groundbreaking studies, the journal also welcomes scientifically sound investigations that provide meaningful insights, including studies with negative findings. AAU-JMR continues to uphold the principles of transparency, rigorous peer review, academic integrity, and open-access dissemination of scientific knowledge.

The journal serves as a platform for the publication of original research articles, case studies, editorials, short communications, and review papers spanning various disciplines within the medical sciences. To ensure credibility and originality, all submitted manuscripts undergo a comprehensive peer-review process conducted by experts in the relevant fields before consideration for publication. Contributions are invited from researchers and scholars both within Nigeria and across the international scientific community. The journal particularly encourages submissions from the Basic Medical Sciences, Clinical Sciences, Laboratory Sciences, and Allied Health disciplines.

This edition features scholarly works from several important areas of health and biomedical research, including Physiology, Anatomy, Medical Biochemistry, Forensic Science, Pharmacology, and Ethnopharmacology. As preparations begin for future editions, the journal seeks to further encourage multidisciplinary studies and practical research efforts that address contemporary health challenges and contribute positively to real-world medical applications.

On behalf of the Editorial Board, I sincerely appreciate the authors, reviewers, editors, and volunteers whose dedication, professionalism, and support made this publication possible. Their commitment to advancing scientific knowledge has been invaluable to the success of this edition.

AAU-JMR remains committed to providing an efficient and credible publication platform that prioritises impactful scientific discoveries, innovative methodologies, and evidence-based reviews capable of advancing medical and scientific knowledge. The journal will continue to support timely publication while maintaining the highest standards of academic excellence and ethical publishing practices.

Thank you for your continued interest and support. I hope you find this edition informative, insightful, and rewarding.
